# CEQA Initial Study - Environmental Checklist Form (Based on the State CEQA Guidelines, Appendix G Rev. 10/04)

1. Title; Project Number(s); Environmental Log Number:

Antonio Minor Subdivision (3 Lots); Tentative Parcel Map, TPM 21030RPL<sup>1</sup>, Log No. 06-14-036

- Lead agency name and address:
   County of San Diego, Department of Planning and Land Use 5201 Ruffin Road, Suite B,
  - San Diego, CA 92123-1666
- 3. a. Contact Mark Slovick, Project Manager
  - b. Phone number: (858) 495-5172
  - c. E-mail: Mark.Slovick@sdcounty.ca.gov.
- 4. Project location:

The project site is located on Los Coches Road approximately 200 feet south of Los Coches Court in the Lakeside Community Planning Group, within unincorporated San Diego County.

Thomas Brothers Coordinates: Page 1232, Grid B/6

5. Project Applicant name and address:

Angel Antonio 7893 Prairie Shadow Road San Diego, CA 92126

6. General Plan Designation

Community Plan: Lakeside
Land Use Designation: (5) Residential
Density: 4.3 du/gross acre

7. Zoning

Use Regulation: RS4, Single Family Residential

Minimum Lot Size: 10,000 square feet

Special Area Regulation: N/A

# 8. Description of project:

The project is a Tentative Parcel Map to subdivide a 1.40 acre parcel into 3 lots. The project site is located adjacent to Los Coches Road in the Lakeside Community Plan Area within unincorporated San Diego County. The site is subject to the General Plan Regional Category 1.1 Current Urban Development Area (CUDA), Land Use Designation (5) Residential. Zoning for the site is RS4, Single Family Residential. The site is currently vacant. Access would be provided by three private driveways connecting to Los Coches Road. The project would be served by sewer and imported water from the Lakeside Water District. No extension of sewer or water utilities will be required by the project. Earthwork will consist of a cut of 170 cubic yards and a fill of 5,160 cubic yards of material, which will require an import of 4,990 cubic yards of material. Retaining walls will be constructed within the project site and along the westerly and southerly boundary of the site. Along the western property line, the wall will begin at a height of approximately 4 feet, then travel south to the southern property line. The wall will reach a height of approximately 9 feet at the property boundary between lot 2 and 3. From the boundary between lot 2 and 3 the retaining wall decreases in height to approximately 2 feet at the southwest corner of lot 1. A 6 foot high concrete masonry unit (CMU) wall will be constructed along the southwest and southern boundary of lot 1. The wall will be provided for fire protection and will eliminiate the requirement to clear 100 feet offsite, into the Los Coches Flood Control Channel. Due to noise levels along Los Coches Road, two 6 foot high CMU walls will be provided on lot 3. The walls will be attached to the residence and will extend to the north approximately 45 feet and to the south approximately 12 feet to the southeast boundary of lot 3.

9. Surrounding land uses and setting (Briefly describe the project's surroundings):

Lands surrounding the project site are used for residential and open space uses. The topography of the project site is flat, with 96 percent of the project site containing slopes less than 15 percent. Overall, the project site slopes gently to the west to an existing residential development, with eight existing residences on similiarly sized lots. To the southeast of the project site is the Los Coches Creek Flood Control Channel. Across Los Coches Road is a larger open space area, with steeper topography. The site is located within 2 miles of Interstate 8 and Highway 67.

- 3 -

10. Other public agencies whose approval is required (e.g., permits, financing approval, or participation agreement):

Permit Type/Action	Agency
Tentative Parcel Map	County of San Diego
Amendment of Conditions	
Expired Map	
Revised Map	
Time Extension	
County Right-of-Way Permits	County of San Diego
Construction Permit	
Excavation Permit	
Encroachment Permit	
Grading Permit	County of San Diego
Grading Permit Plan Change	
General Construction Storm water	RWQCB
Permit	
Water District Approval	Lakeside Water District
Sewer District Approval	Lakeside Sanitation District
Fire District Approval	Lakeside Fire Protection District

**ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:** The environmental factors checked below would be potentially affected by this project and involve at least one impact that is a "Potentially Significant Impact" or a "Less Than Significant With Mitigation Incorporated," as indicated by the checklist on the following pages.

	<u>sthetics</u>	☐ <u>Agricultural Resources</u>	☐ <u>Air Quality</u>
☑ Bic	ological Resources	☐ <u>Cultural Resources</u>	☐ Geology & Soils

<b>DETERMINATION:</b> (To be completed by the Lead Agency) On the basis of this initial evaluation:			
On the basis of this Initial Study, the Department of Planning and Land Use finds that the proposed project COULD NOT have a significant effect on the			

- 4 -

☑ On the basis of this Initial Study, the Department of Planning and Land Use finds that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
 ☐ On the basis of this Initial Study, the Department of Planning and Land Use finds that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

### INSTRUCTIONS ON EVALUATION OF ENVIRONMENTAL IMPACTS

- 1. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2. All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, Less Than Significant With Mitigation Incorporated, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4. "Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level.
- 5. Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
  - a) Earlier Analysis Used. Identify and state where they are available for review.
  - b) Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
  - c) Mitigation Measures. For effects that are "Less Than Significant With Mitigation Incorporated," describe the mitigation measures that were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7. The explanation of each issue should identify:
  - a) The significance criteria or threshold, if any, used to evaluate each question; and
  - b) The mitigation measure identified, if any, to reduce the impact to less than significance

11 IVI Z	11 W 2 10001 C			
I. AESTHETICS Would the project: a) Have a substantial adverse effect on a scenic vista?				
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact	
Discussion/Explanation:				

A vista is a view from a particular location or composite views along a roadway or trail. Scenic vistas often refer to views of natural lands, but may also be compositions of natural and developed areas, or even entirely of developed and unnatural areas, such as a scenic vista of a rural town and surrounding agricultural lands. What is scenic to one person may not be scenic to another, so the assessment of what constitutes a scenic vista must consider the perceptions of a variety of viewer groups.

The items that can be seen within a vista are visual resources. Adverse impacts to individual visual resources or the addition of structures or developed areas may or may not adversely affect the vista. Determining the level of impact to a scenic vista requires analyzing the changes to the vista as a whole and also to individual visual resources.

**No Impact:** The project site is located adjacent to Los Coches Road. Based on a site visit by County staff Mark Slovick on August 29, 2008 the proposed project is not located near or within, or visible from, a scenic vista and will not substantially change the composition of an existing scenic vista in a way that would adversely alter the visual quality or character of the view. Therefore, the proposed project will not have an adverse effect on a scenic vista.

The project will not result in cumulative impacts on a scenic vista because the proposed project viewshed and past, present and future projects within that viewshed were evaluated to determine their cumulative effects. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered. Those projects listed in Section XVII are located within the scenic vista's viewshed and will not contribute to a cumulative impact because: the project proposes the addition of single family residences into a developed area, with similar residential structures on similiarly sized lots. Therefore, the project will not result in adverse project or cumulative impacts on a scenic vista.

b)	Substantially damage scenic resources, outcroppings, and historic buildings with	
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated	Less than Significant Impact No Impact

Discussion/Explanation:

State scenic highways refer to those highways that are officially designated by the California Department of Transportation (Caltrans) as scenic (Caltrans - California Scenic Highway Program). Generally, the area defined within a State scenic highway is the land adjacent to and visible from the vehicular right-of-way. The dimension of a scenic highway is usually identified using a motorist's line of vision, but a reasonable boundary is selected when the view extends to the distant horizon. The scenic highway corridor extends to the visual limits of the landscape abutting the scenic highway.

**No Impact:** Based on a site visit completed by Mark Slovick on August 29, 2008 the proposed project is not located near or visible within the composite viewshed of a State scenic highway and will not damage or remove visual resources within a State scenic highway. The project site is located adjacent to Los Coches Road, which is not defined by the County of San Diego as a scenic highway or scenic corridor. Therefore, the proposed project will not have any substantial adverse effect on a scenic resource within a State scenic highway.

,	Substantially degrade the existing visua surroundings?	i char	acter or quality of the site and its
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: Visual character is the objective composition of the visible landscape within a viewshed. Visual character is based on the organization of the pattern elements line, form, color, and texture. Visual character is commonly discussed in terms of dominance, scale, diversity and continuity. Visual quality is the viewer's perception of the visual environment and varies based on exposure, sensitivity and expectation of the viewers. The existing visual character and quality of the project site and surrounding can be characterized as residential, with undisturbed open space areas.

The proposed project is requests to subdivide a 1.40 acre parcel into 3 lots. The project is compatible with the existing visual environment's visual character and quality for the following reasons: the project will add 3 residences into an area that is already developed with single family residences, with similar lot sizes and square footages. Based upon an analysis of the surrounding houses and square footages, the proposed residences will be compatible with the average square footage of 1,400 square feet.

The project will not result in cumulative impacts on visual character or quality because the entire existing viewshed and a list of past, present and future projects within that viewshed were evaluated. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered. Those projects listed in Section XVII are located within the viewshed surrounding the project and will not contribute to a cumulative impact for the following reasons: the surrounding area contains similarly

sized single family homes on similarly sized lots. Therefore, the project will not result in any adverse project or cumulative level effect on visual character or quality on-site or in the surrounding area.

d)	Create a new source of substantial light day or nighttime views in the area?	or gla	re, which would adversely affect

II. AG	RICULTURAL RESOURCES Would to	he pro	ject:
a)	Convert Prime Farmland, Unique Farmla Importance (Important Farmland), as sh the Farmland Mapping and Monitoring F Agency, or other agricultural resources,	own o rograi	n the maps prepared pursuant to mof the California Resources
	Potentially Significant Impact Less Than Significant With Mitigation		Less than Significant Impact

No Impact

Discussion/Explanation:

Incorporated

**No Impact:** The project site does not contain any agricultural resources, lands designated as Prime Farmland, Unique Farmland, or Farmland of Statewide or Local Importance as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency. Therefore, no agricultural resources including Prime Farmland, Unique Farmland, or Farmland of Statewide or Local Importance will be converted to a non-agricultural use.

b)	(	Conflict with existing zoning for agricultu	ral us	e, or a Williamson Act contract?
		Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact
Dis	cuss	sion/Explanation:		
cor Wil	<b>No Impact:</b> The project site is zoned RS4, Single Family Residential, which is not considered to be an agricultural zone. Additionally, the project site's land is not under a Williamson Act Contract. Therefore, the project does not conflict with existing zoning for agricultural use, or a Williamson Act Contract.			
c)	r	nvolve other changes in the existing entracture, could result in conversion of Impresources, to non-agricultural use?		
		Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

**No Impact:** The project site and surrounding area within a radius of 1 mile does not contain any active agricultural operations or lands designated as Prime Farmland, Unique Farmland, or Farmland of Statewide or Local Importance as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency. Therefore, no Prime Farmland, Unique Farmland, Farmland of Statewide or Local Importance, or active agricultural operations will be converted to a non-agricultural use.

**III. AIR QUALITY** -- Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:

a) Conflict with or obstruct implementation of the San Diego Regional Air Quality Strategy (RAQS) or applicable portions of the State Implementation Plan (SIP)?

	IIO MINOR SUBDIVISION 030RPL <sup>1</sup>	- 10 -		August 27, 2008
	Potentially Significant Impact Less Than Significant With Mitig Incorporated	ation		Less than Significant Impact No Impact
Discuss	sion/Explanation:			
Less Than Significant Impact: The project proposes development that was anticipated in SANDAG growth projections used in development of the RAQS and SIP. Operation of the project will result in emissions of ozone precursors that were considered as a part of the RAQS based on growth projections. As such, the proposed project is not expected to conflict with either the RAQS or the SIP. In addition, the operational emissions from the project are below the screening levels, and subsequently will not violate ambient air quality standards.				
,	/iolate any air quality standard or projected air quality violation?	contrib	oute s	ubstantially to an existing or
	Potentially Significant Impact Less Than Significant With Mitig Incorporated	ation		Less than Significant Impact No Impact
Discuss	sion/Explanation:			

In general, air quality impacts from land use projects are the result of emissions from motor vehicles, and from short-term construction activities associated with such projects. The San Diego County Land Use Environment Group (LUEG) has established guidelines for determining significance which incorporate the Air Pollution Control District's (SDAPCD) established screening-level criteria for all new source review (NSR) in APCD Rule 20.2. These screening-level criteria can be used as numeric methods to demonstrate that a project's total emissions (e.g. stationary and fugitive emissions, as well as emissions from mobile sources) would not result in a significant impact to air quality. Since APCD does not have screening-level criteria for emissions of volatile organic compounds (VOCs), the use of the screening level for reactive organic compounds (ROC) from the South Coast Air Quality Management District (SCAQMD) for the Coachella Valley (which are more appropriate for the San Diego Air Basin) are used.

# **Less Than Significant Impact:**

The project proposes to subdivide a 1.40 acre parcel into 3 lots. However, grading operations associated with the construction of the project would be subject to County of San Diego Grading Ordinance, which requires the implementation of dust control measures. Emissions from the construction phase would be minimal, temporary and localized, resulting in pollutant emissions below the screening-level criteria established by the LUEG guidelines for determining significance. In addition, the vehicle trips generated from the project will result in 30 Average Daily Trips (ADTs). According to the Bay Area Air Quality Management District CEQA Guidelines for Assessing the Air Quality Impacts of Projects and Plans, projects that generate less than 2,000 ADT are

below the screening-level criteria established by the guidelines for criteria pollutants. As such, the project will not violate any air quality standard or contribute substantially to an existing or projected air quality violation.

· · · · · · · · · · · · · · · · · · ·	Result in a cumulatively considerable newhich the project region is non-attainme ambient air quality standard (including requantitative thresholds for ozone precure	nt und eleasii	der an applicable federal or state ng emissions which exceed
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact

## Discussion/Explanation:

San Diego County is presently in non-attainment for the 1-hour concentrations under the California Ambient Air Quality Standard (CAAQS) for Ozone (O<sub>3</sub>). San Diego County is also presently in non-attainment for the annual geometric mean and for the 24-hour concentrations of Particulate Matter less than or equal to 10 microns (PM<sub>10</sub>) under the CAAQS. O<sub>3</sub> is formed when volatile organic compounds (VOCs) and nitrogen oxides (NO<sub>x</sub>) react in the presence of sunlight. VOC sources include any source that burns fuels (e.g., gasoline, natural gas, wood, oil); solvents; petroleum processing and storage; and pesticides. Sources of PM<sub>10</sub> in both urban and rural areas include: motor vehicles, wood burning stoves and fireplaces, dust from construction, landfills, agriculture, wildfires, brush/waste burning, and industrial sources of windblown dust from open lands.

Less Than Significant Impact: Air quality emissions associated with the project include emissions of PM<sub>10</sub>, NO<sub>x</sub> and VOCs from construction/grading activities, and also as the result of increase of traffic from project implementation. However, grading operations associated with the construction of the project would be subject to County of San Diego Grading Ordinance, which requires the implementation of dust control measures. Emissions from the construction phase would be minimal, localized and temporary resulting in PM<sub>10</sub> and VOC emissions below the screening-level criteria established by the LUEG guidelines for determining significance. The vehicle trips generated from the project will result in 30 Average Daily Trips (ADTs). According to the Bay Area Air Quality Management District CEQA Guidelines for Assessing the Air Quality Impacts of Projects and Plans, projects that generate less than 2,000 ADT are below the screening-level criteria established by the LUEG guidelines for determining significance.

In addition, a list of past, present and future projects within the surrounding area were evaluated and none of these projects emit significant amounts of criteria pollutants. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered. The proposed project as well as the past, present and future projects within the surrounding area, have emissions below the screening-level criteria established by the LUEG guidelines for determining significance, therefore, the

construction and operational emissions associated with the proposed project are not expected to create a cumulatively considerable impact nor a considerable net increase of PM10, or any  $O_3$  precursors.

d) [	Expose sensitive receptors to substantia	al pollu	utant concentrations?
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		
Grade) house i in air qu	lity regulators typically define sensitive r , hospitals, resident care facilities, or da ndividuals with health conditions that wo uality. The County of San Diego also co ors since they house children and the eld	y-care ould b onside	e centers, or other facilities that may e adversely impacted by changes
recepto mile (th typically air pollu	pact: Based a site visit conducted by Ma ors and point sources of toxic emissions be radius determined by the SCAQMD in y significant) of the proposed project. Four utants (other than vehicle emissions) are ject will not expose sensitive populations	have whick urther asso	not been identified within a quarter- h the dilution of pollutants is more, no point-source emissions of ciated with the project. As such,
e) (	Create objectionable odors affecting a s	ubstaı	ntial number of people?
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Evalanation:		

Discussion/Explanation:

**Less Than Significant Impact:** The project could produce objectionable odors, which would result from volatile organic compounds, ammonia, carbon dioxide, hydrogen sulfide, methane, alcohols, aldehydes, amines, carbonyls, esters, disulfides dust and endotoxins from the construction and operational phases. However, these substances, if present at all, would only be in trace amounts (less that 1 µg/m³). Subsequently, no significant air quality – odor impacts are expected to affect surrounding receptors. Moreover, the affects of objectionable odors are localized to the immediate surrounding area and will not contribute to a cumulatively considerable odor.

# IV. BIOLOGICAL RESOURCES -- Would the project:

Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?

August 27, 2008

	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		
project s and dat undevel develop of disturcoastal coastal mitigate be requ by prese	site were evaluated in a Biological Resoluted March 24, 2008. The site is 1.40 acroloped land. The site is adjacent to Los Coment. The site consists primarily of 1.03 rbed habitat. There is a small amount of sage scrub and 0.24 acres of non native sage scrub, off-site purchase of coastal for loss of non-native grassland, offsite ired. All potentially gnificance. ian habitat or other sensitive all plans, policies, regulations or by
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact
Discuss	sion/Explanation:		

Less Than Significant Impact: No riparian habitat has been identified within the area proposed for development. There is a disturbed portion of Los Coches creek offsite approximately 100 feet to the south of the property. There are no proposed offsite impacts to this drainage. The project is not expected to have direct or indirect impacts from development on any riparian habitat. Therefore, impacts are considered less than significant since no direct impacts are expected to occur to any riparian habitats or

sensitive natural community identified in the County of San Diego Multiple Species Conservation Program, County of San Diego Resource Protection Ordinance, Natural Community Conservation Plan, Fish and Game Code, Endangered Species Act, Clean Water Act, or any other local or regional plans, policies or regulations.

c)	Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?				
	Potentially Significant Impact		Less than Significant Impact		
	Less Than Significant With Mitigation Incorporated	$\overline{\checkmark}$	No Impact		
Discus	ssion/Explanation:				
<b>No Impact:</b> Based on a site survey conducted May 1, 2007 it has been determined that the proposed project site does not contain any wetlands as defined by Section 404 of the Clean Water Act, including, but not limited to, marsh, vernal pool, stream, lake, river or water of the U.S., that could potentially be impacted through direct removal, filling, hydrological interruption, diversion or obstruction by the proposed development. Therefore, no impacts will occur to wetlands defined by Section 404 of the Clean Water Act in which the Army Corps of Engineers maintains jurisdiction over.					
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?					
	Potentially Significant Impact	$\checkmark$	Less than Significant Impact		
	Less Than Significant With Mitigation Incorporated		No Impact		

Discussion/Explanation:

Less than Significant Impact: Based on an analysis of the County's Geographic Information System (GIS) records and the County's Comprehensive Matrix of Sensitive Species staff have determined that the site has limited biological value. The site predominantly contains developed habitat adjacent to existing dense residential development and Los Coches Road. Aerial evidence shows the site has been continually disturbed with residential use, which would not be ideal for wildlife movement corridors or nursery sites. Properties north, south, east, and west are currently developed with high density single family residential development. There is an existing corridor approximately 4 mile to the south of the proposed project along existing Sweetwater creek that local wildlife would likely use as an ideal corridor. Therefore, it is not expected that the proposed project would result in impedance of the movement of any native resident or migratory fish or wildlife species, the use of an established native resident or migratory wildlife corridors, and/or the use of native wildlife nursery sites.

Discussion/Explanation:

e)	Conflict with the provisions of any adopted Habitat Conservation Plan, Natural Communities Conservation Plan, other approved local, regional or state habitat conservation plan or any other local policies or ordinances that protect biological resources?					
	Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact			
	Less Than Significant With Mitigation Incorporated		No Impact			
Discu	ssion/Explanation:					
for fur Natura conse Mana biolog Biolog	Less Than Significant Impact: Refer to the attached Ordinance Compliance Checklist for further information on consistency with any adopted Habitat Conservation Plan, Natural Communities Conservation Plan, other approved local, regional or state habitat conservation plan, including, Habitat Management Plans (HMP) Special Area Management Plans (SAMP) or any other local policies or ordinances that protect biological resources including the Multiple Species Conservation Program (MSCP), Biological Mitigation Ordinance, Resource Protection Ordinance (RPO), Habitat Loss Permit (HLP).					
<u>V. Cl</u> a)	JLTURAL RESOURCES Would the pro Cause a substantial adverse change in t as defined in 15064.5?		gnificance of a historical resource			
	Potentially Significant Impact		Less than Significant Impact			
	Less Than Significant With Mitigation Incorporated	$\checkmark$	No Impact			
Discu	ssion/Explanation:					
<b>No Impact:</b> Based on an analysis of records and a survey of the property by a County of San Diego approved archaeologist, Andrew Pigniolo on January 16, 2007, it has been determined that there are no impacts to historical resources because they do not occur within the project site. The results of the survey are provided in the cultural resources report titled, "Negative Cultural Resources Survey Report Letter" prepared by Andrew Pigniolo, dated February 2007.						
b)	Cause a substantial adverse change in tresource pursuant to 15064.5?	the sig	gnificance of an archaeological			
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact			

**No Impact:** Based on an analysis of records and a survey of the property by a County of San Diego approved archaeologist, Andrew Pigniolo on January 16, 2007, it has been determined that the project site does not contain any archaeological resources. The results of the survey are provided in the cultural resources report titled, "Negative Cultural Resources Survey Report Letter" prepared by Andrew Pigniolo, dated February 2007. Site CA-SDI-9238 (bedrock milling features) was previously recorded within the project boundaries; however, this site was not relocated during the current survey. Careful reexamination of the area indicated that grading has occurred and that most of the boulders on site have been relocated. No cultural material was identified and none is anticipated based on the extent of grading in the area.

c) Directly or indirectly destroy a unique ge	ologic	feature?				
<ul><li>☐ Potentially Significant Impact</li><li>☐ Less Than Significant With Mitigation Incorporated</li></ul>		Less than Significant Impact No Impact				
Discussion/Explanation: San Diego County has a variety of geologic environments and geologic processes which generally occur in other parts of the state, country, and the world. However, some features stand out as being unique in one way or another within the boundaries of the County.						
<b>No Impact:</b> The site does not contain any unique geologic features that have been listed in the County's Guidelines for Determining Significance for Unique Geology Resources nor does the site support any known geologic characteristics that have the potential to support unique geologic features.						
d) Directly or indirectly destroy a unique pa	leonto	ological resource or site?				
<ul><li>Potentially Significant Impact</li><li>Less Than Significant With Mitigation Incorporated</li></ul>		Less than Significant Impact No Impact				
Discussion/Explanation:						
<b>No Impact:</b> A review of the County's Paleonto the project is located entirely on plutonic igneoproducing fossil remains.	_	•				
e) Disturb any human remains, including the cemeteries?	ose ir	nterred outside of formal				
<ul><li>☐ Potentially Significant Impact</li><li>☐ Less Than Significant With Mitigation Incorporated</li></ul>		Less than Significant Impact No Impact				

Discussion/Explanation:

**No Impact:** Based on an analysis of records and a survey of the property by a County of San Diego approved archaeologist, Andrew Pigniolo on January 16, 2007, it has been determined that the project will not disturb any human remains because the project site does not include a formal cemetery or any archaeological resources that might contain interred human remains. The results of the survey are provided in the cultural resources report titled, "Negative Cultural Resources Survey Report Letter" prepared by Andrew Pigniolo, dated February 2007.

# VI. GEOLOGY AND SOILS -- Would the project:

Less Than Significant With Mitigation

a)	Expose people or structures to potential substantial adverse effects, including the
	risk of loss, injury, or death involving:

i.		Rupture of a known earthquake fa Alquist-Priolo Earthquake Fault Z for the area or based on other sul Refer to Division of Mines and Ge	oning ostant	Map issued by the State Geologist ial evidence of a known fault?
		ntially Significant Impact		Less than Significant Impact
		Than Significant With Mitigation porated	$\overline{\checkmark}$	No Impact
Discuss	ion/E	xplanation:		
<b>No Impact:</b> The project is not located in a fault rupture hazard zone identified by the Alquist-Priolo Earthquake Fault Zoning Act, Special Publication 42, Revised 1997, Fault-Rupture Hazards Zones in California, or located within any other area with substantial evidence of a known fault. Therefore, there will be no impact from the exposure of people or structures to adverse effects from a known fault-rupture hazard zone as a result of this project.				
ii	i.	Strong seismic ground shaking?		
	Pote	ntially Significant Impact	$\checkmark$	Less than Significant Impact

Discussion/Explanation:

Incorporated

**Less Than Significant Impact:** To ensure the structural integrity of all buildings and structures, the project must conform to the Seismic Requirements as outlined within the California Building Code. The County Code requires a soils compaction report with proposed foundation recommendations to be approved before the issuance of a building permit. Therefore, compliance with the California Building Code and the County Code

No Impact

ensures the project will not result in a potentially significant impact from the exposure of people or structures to potential adverse effects from strong seismic ground shaking.

I	II.	Seismic-related ground failure, inc	cludin	g liquefaction?	
	Less	entially Significant Impact s Than Significant With Mitigation rporated		Less than Significant Impact No Impact	
Discus	sion/E	Explanation:			
the Cou indicate failure f located people	No Impact: The project site is not within a "Potential Liquefaction Area" as identified in he County Guidelines for Determining Significance for Geologic Hazards. This ndicates that the geologic environment of the project site is not susceptible to ground failure from seismic activity. In addition, the site is not underlain by poor artificial fill or ocated within a floodplain. Therefore, there will be no impact from the exposure of people or structures to adverse effects from a known area susceptible to ground failure, including liquefaction.				
İ	V.	Landslides?			
	Less	entially Significant Impact s Than Significant With Mitigation rporated		Less than Significant Impact No Impact	

Discussion/Explanation:

No Impact: The project site is not within a "Landslide Susceptibility Area" as identified in the County Guidelines for Determining Significance for Geologic Hazards. Landslide Susceptibility Areas were developed based on landslide risk profiles included in the *Multi-Jurisdictional Hazard Mitigation Plan, San Diego, CA* (URS, 2004). Landslide risk areas from this plan were based on data including steep slopes (greater than 25%); soil series data (SANDAG based on USGS 1970s series); soil-slip susceptibility from USGS; and Landslide Hazard Zone Maps (limited to western portion of the County) developed by the California Department of Conservation, Division of Mines and Geology (DMG). Also included within Landslide Susceptibility Areas are gabbroic soils on slopes steeper than 15% in grade because these soils are slide prone. Since the project is not located within an identified Landslide Susceptibility Area and the geologic environment has a low probability to become unstable, the project would have no impact from the exposure of people or structures to potential adverse effects from landslides.

Less Than Significant Impact: The site is located within a "Landslide Susceptibility Area" as identified in the County Guidelines for Determining Significance for Geologic Hazards. Landslide Susceptibility Areas were developed based on landslide risk profiles included in the *Multi-Jurisdictional Hazard Mitigation Plan, San Diego, CA* (URS, 2004). Landslide risk areas from this plan were based on data including steep slopes (greater than 25%); soil series data (SANDAG based on USGS 1970s series); soil-slip

susceptibility from USGS; and Landslide Hazard Zone Maps (limited to western portion of the County) developed by the California Department of Conservation, Division of Mines and Geology (DMG). Also included within Landslide Susceptibility Areas are gabbroic soils on slopes steeper than 15% in grade because these soils are slide prone. A review of the project site has determined that the area does not show evidence of either pre-existing or potential conditions that could become unstable and result in landslides. Therefore, there will be no potentially significant impact from the exposure of people or structures to adverse effects from adverse effects of landslides.

<b>O</b> )	ŀ	Result in substantial soil erosion or the l	oss of	topsoil?
		Potentially Significant Impact Less Than Significant With Mitigation Incorporated	_	Less than Significant Impact No Impact

Discussion/Explanation:

Less Than Significant Impact: According to the Soil Survey of San Diego County, the soils on-site are identified as TuB, Tujunga Sand and GoA, Grangeville that have a soil erodibility rating of "severe" as indicated by the Soil Survey for the San Diego Area, prepared by the US Department of Agriculture, Soil Conservation and Forest Service dated December 1973. However, the project will not result in substantial soil erosion or the loss of topsoil for the following reasons:

- The project will not result in unprotected erodible soils; will not alter existing drainage patterns; is not located in a floodplain, wetland, or significant drainage feature; and will not develop steep slopes.
- The project has prepared a Storm water Management Plan received by DPLU on December 14, 2007 and LID checklist received by DPLU on June 6, 2008, prepared by Martin and Ziemniak Civil Engineering and Land Surveying. The plan includes the following construction Best Management Practices to ensure sediment does not erode from the project site: silt fences, fiber rolls, street sweeping and vacuuming, storm drain inlet protection, stockpile management, solid waste management, stabilized construction entrance/exit, gravel bag berm, material delivery and storage, spill prevention and control, concrete waste management, water conservation practices, paving and grinding operations and any minor slopes created incidental to construction and not subject to a major or minor grading permit shall be protected by covering with plastic or tarp prior to a rain event, and shall have vegetative cover reestablished within 180 days of completion of the slope and prior to final building approval. The following treatment control BMP's will used: grass swales, porous asphalt and porous concrete.
- The project involves grading. However, the project is required to comply with the San Diego County Code of Regulations, Title 8, Zoning and Land Use Regulations, Division 7, Sections 87.414 (DRAINAGE - EROSION

PREVENTION) and 87.417 (PLANTING). Compliance with these regulations minimizes the potential for water and wind erosion.

Due to these factors, it has been found that the project will not result in substantial soil erosion or the loss of topsoil on a project level.

In addition, the project will not contribute to a cumulatively considerable impact because all the of past, present and future projects included on the list of projects that involve grading or land disturbance are required to follow the requirements of the San Diego County Code of Regulations, Title 8, Zoning and Land Use Regulations, Division 7, Sections 87.414 (DRAINAGE - EROSION PREVENTION) and 87.417 (PLANTING); Order 2001-01 (NPDES No. CAS 0108758), adopted by the San Diego Region RWQCB on February 21, 2001; County Watershed Protection, Storm Water Management, and Discharge Control Ordinance (WPO) (Ord. No. 9424); and County Storm water Standards Manual adopted on February 20, 2002, and amended January 10, 2003 (Ordinance No. 9426). Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

Will the project produce unstable geological conditions that will result in adverse

	impacts resulting from landslides, lateral spreading, subsidence, liquefaction or collapse?				
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		
Discus	ssion/Explanation:				
<b>Less Than Significant Impact:</b> The project will result in site disturbance and grading of 170 cubic yards of cut, 5,160 cubic yards of fill and 4,990 cubic yards of import. The proposed project is consistent with the geological formations underlying the site. For further information refer to VI Geology and Soils, Question a., i-iv listed above.					
Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?					
	Potentially Significant Impact	$\checkmark$	Less than Significant Impact		
	Less Than Significant With Mitigation Incorporated		No Impact		
Discussion/Explanation:					

c)

**Less Than Significant Impact:** The project is located on expansive soils as defined within Table 18-I-B of the Uniform Building Code (1994). This was confirmed by staff review of the Soil Survey for the San Diego Area, prepared by the US Department of Agriculture, Soil Conservation and Forest Service dated December 1973. The soils onsite are TuB, Tujunga Sand and GoA, Grangeville Fine Sandy Loam. However the

project will not have any significant impacts because the project is required to comply the improvement requirements identified in the 1997 Uniform Building Code, Division III – Design Standard for Design of Slab-On-Ground Foundations to Resist the Effects of Expansive Soils and Compressible Soils, which ensure suitable structure safety in areas with expansive soils. Therefore, these soils will not create substantial risks to life or property.

e)	Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?				
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		
Discus	ssion/Explanation:				
No Impact: The project will rely on public water and sewer for the disposal of wastewater. A service availability letter dated May 12, 2006 has been received from the Lakeside Water District and Lakeside Sanitation District indicate that the facility has adequate capacity for the projects wastewater disposal needs. No septic tanks or alternative wastewater disposal systems are proposed.  VII. HAZARDS AND HAZARDOUS MATERIALS Would the project:					
a) Create a significant hazard to the public or the environment through the routine transport, storage, use, or disposal of hazardous materials or wastes or through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?					
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated	<u> </u>	Less than Significant Impact No Impact		

Discussion/Explanation:

**No Impact**: The project will not create a significant hazard to the public or the environment because it does not propose the storage, use, transport, emission, or disposal of Hazardous Substances, nor are Hazardous Substances proposed or currently in use in the immediate vicinity. In addition, the project does not propose to demolish any existing structures onsite and therefore would not create a hazard related to the release of asbestos, lead based paint or other hazardous materials from demolition activities.

	Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?				
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		
Discus	sion/Explanation:				
<b>No Impact:</b> The project is not located within one-quarter mile of an existing or proposed school. Therefore, the project will not have any effect on an existing or proposed school.					
,	Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5, or is otherwise known to have been subject to a release of hazardous substances and, as a result, would it create a significant hazard to the public or the environment?				
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		

# Discussion/Explanation:

**No Impact:** Based on a site visit and regulatory database search, the project site has not been subject to a release of hazardous substances. The project site is not included in any of the following lists or databases: the State of California Hazardous Waste and Substances sites list compiled pursuant to Government Code Section 65962.5., the San Diego County Hazardous Materials Establishment database, the San Diego County DEH Site Assessment and Mitigation (SAM) Case Listing, the Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program Database ("CalSites" Envirostor Database), the Resource Conservation and Recovery Information System (RCRIS) listing, the EPA's Superfund CERCLIS database or the EPA's National Priorities List (NPL). Additionally, the project does not propose structures for human occupancy or significant linear excavation within 1,000 feet of an open, abandoned, or closed landfill, is not located on or within 250 feet of the boundary of a parcel identified as containing burn ash (from the historic burning of trash), is not on or within 1,000 feet of a Formerly Used Defense Site (FUDS), does not contain a leaking Underground Storage Tank, and is not located on a site with the potential for contamination from historic uses such as intensive agriculture, industrial uses, a gas station or vehicle repair shop. Therefore, the project would not create a significant hazard to the public or environment.

d) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?

	IIO MINOR SUBDIVISION - 23 - 1030RPL <sup>1</sup>		August 27, 2008			
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact			
Discuss	sion/Explanation:					
Compa Aviatior airport. greater from an	<b>No Impact:</b> The proposed project is not located within an Airport Land Use Compatibility Plan (ALUCP), a Comprehensive Land Use Plan (CLUP), within a Federal Aviation Administration Height Notification Surface, or within two miles of a public airport. Also, the project does not propose construction of any structure equal to or greater than 150 feet in height, constituting a safety hazard to aircraft and/or operations from an airport or heliport. Therefore, the project will not constitute a safety hazard for people residing or working in the project area.

	Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?					
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact			
Discussion/Explanation:						
The following sections summarize the project's consistency with applicable emergency response plans or emergency evacuation plans.						

**Less Than Significant Impact:** The Operational Area Emergency Plan is a comprehensive emergency plan that defines responsibilities, establishes an emergency organization, defines lines of communications, and is designed to be part of the

OPERATIONAL AREA EMERGENCY PLAN AND MULTI-JURISDICTIONAL

i.

HAZARD MITIGATION PLAN:

statewide Standardized Emergency Management System. The Operational Area Emergency Plan provides guidance for emergency planning and requires subsequent plans to be established by each jurisdiction that has responsibilities in a disaster situation. The Multi-Jurisdictional Hazard Mitigation Plan includes an overview of the risk assessment process, identifies hazards present in the jurisdiction, hazard profiles, and vulnerability assessments. The plan also identifies goals, objectives and actions for each jurisdiction in the County of San Diego, including all cities and the County unincorporated areas. The project will not interfere with this plan because it will not prohibit subsequent plans from being established or prevent the goals and objectives of existing plans from being carried out.

# ii. SAN DIEGO COUNTY NUCLEAR POWER STATION EMERGENCY RESPONSE PLAN

**No Impact:** The San Diego County Nuclear Power Station Emergency Response Plan will not be interfered with by the project due to the location of the project, plant and the specific requirements of the plan. The emergency plan for the San Onofre Nuclear Generating Station includes an emergency planning zone within a 10-mile radius. All land area within 10 miles of the plant is not within the jurisdiction of the unincorporated County and as such a project in the unincorporated area is not expected to interfere with any response or evacuation.

### iii. OIL SPILL CONTINGENCY ELEMENT

**No Impact:** The Oil Spill Contingency Element will not be interfered with because the project is not located along the coastal zone or coastline.

iv. EMERGENCY WATER CONTINGENCIES ANNEX AND ENERGY SHORTAGE RESPONSE PLAN

**No Impact:** The Emergency Water Contingencies Annex and Energy Shortage Response Plan will not be interfered with because the project does not propose altering major water or energy supply infrastructure, such as the California Aqueduct.

### v. DAM EVACUATION PLAN

**No Impact:** The Dam Evacuation Plan will not be interfered with because the project is not located within a dam inundation zone.

0,	Expose people or structures to a signific wildland fires, including where wildlands where residences are intermixed with wi	are a	adjacent to urbanized areas or
	r otoritianly organicant impact	$\overline{\checkmark}$	Less than Significant Impact
	Less Than Significant With Mitigation Incorporated		No Impact

Discussion/Explanation:

Less Than Significant Impact: The proposed project is adjacent to wildlands that have the potential to support wildland fires. However, the project will not expose people or structures to a significant risk of loss, injury or death involving wildland fires because the project will comply with the regulations relating to emergency access, water supply, and defensible space specified in the Consolidated Fire Code for the 17 Fire Protection Districts in San Diego County and Appendix II-A, as adopted and amended by the local fire protection district. Implementation of these fire safety standards will occur during the Tentative Map, Tentative Parcel Map, or building permit process. Also, a Fire Service Availability Letter and conditions, dated August 21, 2008, have been received from the Lakeside Fire Protection District. The conditions from the Lakeside Fire Protection District include: due to the home location on Parcel 1, a 6 foot high concrete masonry unit or simliar type construction wall must be placed along the southern and eastern property lines of proposed Parcel 1 to provide adequate mitigation from a potential fire hazard. The Fire Service Availability Letter indicates the expected emergency travel time to the project site to be 5 minutes. The Maximum Travel Time allowed pursuant to the County Public Facilities Element is 5 minutes. Therefore, based on the review of the project by County staff, through compliance with the Consolidated Fire Code and Appendix II-A and through compliance with the Lakeside Fire Protection District's conditions, the project is not anticipated to expose people or structures to a significant risk of loss, injury or death involving hazardous wildland fires. Moreover, the project will not contribute to a cumulatively considerable impact, because all past. present and future projects in the surrounding area are required to comply with the Consolidated Fire Code and Appendix II-A.

•	Propose a use, or place residents adjac foreseeable use that would substantially exposure to vectors, including mosquito transmitting significant public health dise	incre es, ra	ase current or future resident's ts or flies, which are capable of
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

**No Impact:** The project does not involve or support uses that allow water to stand for a period of 72 hours (3 days) or more (e.g. artificial lakes, agricultural irrigation ponds). Also, the project does not involve or support uses that will produce or collect animal waste, such as equestrian facilities, agricultural operations (chicken coops, dairies etc.), solid waste facility or other similar uses. Moreover, based on a site visit conducted by Mark Slovick on August 29, 2008 there are none of these uses on adjacent properties. Therefore, the project will not substantially increase current or future resident's exposure to vectors, including mosquitoes, rats or flies.

August 27, 2008

	YDROLOGY AND WATER QUALITY Violate any waste discharge requiremen	d the project:
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated	Less than Significant Impact No Impact
Discuss	sion/Explanation:	

# **Less Than Significant Impact:**

The project proposes to subdivide a 1.40 acre parcel into 3 lots which may require NPDES permit for discharges associated with storm water associated with construction activities. The project applicant has provided a copy of a stormwater management plan which demonstrates that the project will comply with all requirements of San Diego Regional Water Quality Control Board and San Diego County Watershed Protection Ordinance. The project site proposes and will be required to implement the following site design measures and/or source control BMPs and/or treatment control BMPs to reduce potential pollutants to the maximum extent practicable from entering storm water runoff: silt fences, fiber rolls, street sweeping and vacuuming, storm drain inlet protection, stockpile management, solid waste management, stabilized construction entrance/exit, gravel bag berm, material delivery and storage, spill prevention and control, concrete waste management, water conservation practices, paving and grinding operations and any minor slopes created incidental to construction and not subject to a major or minor grading permit shall be protected by covering with plastic or tarp prior to a rain event, and shall have vegetative cover reestablished within 180 days of completion of the slope and prior to final building approval. The following treatment control BMP's will used: grass swales, porous asphalt and porous concrete. These measures will enable the project to meet waste discharge requirements as required by the Land-Use Planning for New Development and Redevelopment Component of the San Diego Municipal Permit (SDRWQCB Order No. 2001-01), as implemented by the San Diego County Jurisdictional Urban Runoff Management Program (JURMP) and Standard Urban Storm Water Mitigation Plan (SUSMP).

Finally, the project's conformance to the waste discharge requirements listed above ensures the project will not create cumulatively considerable water quality impacts related to waste discharge because, through the permit, the project will conform to Countywide watershed standards in the JURMP and SUSMP, derived from State regulation to address human health and water quality concerns. Therefore, the project will not contribute to a cumulatively considerable impact to water quality from waste discharges.

	arges.	•	, , ,
b)	Is the project tributary to an already in Water Act Section 303(d) list? If so, o pollutant for which the water body is a	ould the	e project result in an increase in any
	Potentially Significant Impact	V	Less than Significant Impact

NO MINOR SUBDIVISION 1030RPL <sup>1</sup>	- 27 -		August 27, 2008
Less Than Significant With Miti Incorporated	gation	No Impact	

Discussion/Explanation:

**Less Than Significant Impact:** The project lies in the 907.14 Coches Has hydrologic subarea, within the San Diego hydrologic unit. According to the Clean Water Act Section 303(d) list, July 2003, a portion of this watershed at the Pacific Ocean and mouth of the San Diego River is impaired for coliform bacteria. Constituents of concern in the San Diego watershed include coliform bacteria, total dissolved solids, nutrients, petroleum chemicals, toxics, and trash.

The project proposes the following activities that are associated with these pollutants: detached residential development. However, the following site design measures and/or source control BMPs and/or treatment control BMPs will be employed such that potential pollutants will be reduced in any runoff to the maximum extent practicable so as not to increase the level of these pollutants in receiving waters: silt fences, fiber rolls, street sweeping and vacuuming, storm drain inlet protection, stockpile management, solid waste management, stabilized construction entrance/exit, gravel bag berm, material delivery and storage, spill prevention and control, concrete waste management, water conservation practices, paving and grinding operations and any minor slopes created incidental to construction and not subject to a major or minor grading permit shall be protected by covering with plastic or tarp prior to a rain event, and shall have vegetative cover reestablished within 180 days of completion of the slope and prior to final building approval. The following treatment control BMP's will used: grass swales, porous asphalt and porous concrete.

The proposed BMPs are consistent with regional surface water and storm water planning and permitting process that has been established to improve the overall water quality in County watersheds. As a result the project will not contribute to a cumulative impact to an already impaired water body, as listed on the Clean Water Act Section 303(d). Regional surface water and storm water permitting regulation for County of San Diego, Incorporated Cities of San Diego County, and San Diego Unified Port District includes the following: Order 2001-01 (NPDES No. CAS 0108758), adopted by the San Diego Region RWQCB on February 21, 2001; County Watershed Protection, Storm Water Management, and Discharge Control Ordinance (WPO) (Ord. No. 9424); County Storm water Standards Manual adopted on February 20, 2002, and amended January 10, 2003 (Ordinance No. 9426). The stated purposes of these ordinances are to protect the health, safety and general welfare of the County of San Diego residents; to protect water resources and to improve water quality; to cause the use of management practices by the County and its citizens that will reduce the adverse effects of polluted runoff discharges on waters of the state; to secure benefits from the use of storm water as a resource; and to ensure the County is compliant with applicable state and federal laws. Ordinance No. 9424 (WPO) has discharge prohibitions, and requirements that vary depending on type of land use activity and location in the County. Ordinance No. 9426 is Appendix A of Ordinance No. 9424 (WPO) and sets out in more detail, by project category, what Dischargers must do to comply with the Ordinance and to receive permits for projects and activities that are subject to the Ordinance. Collectively, these regulations establish standards for projects to follow which intend to improve water

quality from headwaters to the deltas of each watershed in the County. Each project subject to WPO is required to prepare a Storm water Management Plan that details a project's pollutant discharge contribution to a given watershed and propose BMPs or design measures to mitigate any impacts that may occur in the watershed.

,	Could the proposed project cause or co- surface or groundwater receiving water beneficial uses?	• •
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated	Less than Significant Impact No Impact

Discussion/Explanation:

**Less Than Significant Impact:** The Regional Water Quality Control Board has designated water quality objectives for waters of the San Diego Region as outlined in Chapter 3 of the Water Quality Control Plan (Plan). The water quality objectives are necessary to protect the existing and potential beneficial uses of each hydrologic unit as described in Chapter 2 of the Plan.

The project lies in the 907.14 hydrologic subarea, within the San Diego hydrologic unit that has the following existing and potential beneficial uses for inland surface waters, coastal waters, reservoirs and lakes, and ground water: municipal and domestic supply; agricultural supply; industrial process supply, industrial service supply; hydropower generation; contact water recreation; non-contact water recreation; warm freshwater habitat; cold freshwater habitat; wildlife habitat; commercial and sport fishing; estuarine habitat; marine habitat; migration of aquatic organisms; shellfish harvesting; and, rare, threatened, or endangered species habitat.

The project proposes the following potential sources of polluted runoff: detached residential development. However, the following site design measures and/or source control BMPs and/or treatment control BMPs will be employed to reduce potential pollutants in runoff to the maximum extent practicable, such that the proposed project will not cause or contribute to an exceedance of applicable surface or groundwater receiving water quality objectives or degradation of beneficial uses: silt fences, fiber rolls, street sweeping and vacuuming, storm drain inlet protection, stockpile management, solid waste management, stabilized construction entrance/exit, gravel bag berm, material delivery and storage, spill prevention and control, concrete waste management, water conservation practices, paving and grinding operations and any minor slopes created incidental to construction and not subject to a major or minor grading permit shall be protected by covering with plastic or tarp prior to a rain event, and shall have vegetative cover reestablished within 180 days of completion of the slope and prior to final building approval. The following treatment control BMP's will used: grass swales, porous asphalt and porous concrete.

In addition, the proposed BMPs are consistent with regional surface water, storm water and groundwater planning and permitting process that has been established to improve the overall water quality in County watersheds. As a result, the project will not contribute to a cumulatively considerable exceedance of applicable surface or groundwater receiving water quality objectives or degradation of beneficial uses. Refer to Section VIII., Hydrology and Water Quality, Question b, for more information on regional surface water and storm water planning and permitting process.

,	Substantially deplete groundwater supply groundwater recharge such that there we allowering of the local groundwater table existing nearby wells would drop to a levuses or planned uses for which permits	ould be levelowed which welcomes to the world with	be a net deficit in aquifer volume or I (e.g., the production rate of pre- lich would not support existing land

The project ing irrigation, domestic or not involve operations that would luding, but not limited to the sion of water to another a stream course or waterway with s, for substantial distances (e.g. 1/4 ally affect rates of groundwater
	Substantially alter the existing drainage		
	through the alteration of the course of a result in substantial erosion or siltation of		

Discussion/Explanation:

Less Than Significant Impact: The project proposes to subdivide a 1.40 acre parcel into 3 lots. As outlined in the Storm water Management Plan (SWMP) received by DPLU on December 18, 2007 and LID checklist received by DPLU on June 6, 2008 prepared by Martin and Ziemniak Civil Engineering and Land Surveying, the project will implement the following site design measures, source control, and/or treatment control BMPs to reduce potential pollutants, including sediment from erosion or siltation, to the maximum extent practicable from entering storm water runoff: silt fences, fiber rolls, street sweeping and vacuuming, storm drain inlet protection, stockpile management,

solid waste management, stabilized construction entrance/exit, gravel bag berm, material delivery and storage, spill prevention and control, concrete waste management, water conservation practices, paving and grinding operations and any minor slopes created incidental to construction and not subject to a major or minor grading permit shall be protected by covering with plastic or tarp prior to a rain event, and shall have vegetative cover reestablished within 180 days of completion of the slope and prior to final building approval. The following treatment control BMP's will used: grass swales, porous asphalt and porous concrete. These measures will control erosion and sedimentation and satisfy waste discharge requirements as required by the Land-Use Planning for New Development and Redevelopment Component of the San Diego Municipal Permit (SDRWQCB Order No. 2001-01), as implemented by the San Diego County Jurisdictional Urban Runoff Management Program (JURMP) and Standard Urban Storm Water Mitigation Plan (SUSMP). The SWMP specifies and describes the implementation process of all BMPs that will address equipment operation and materials management, prevent the erosion process from occurring, and prevent sedimentation in any onsite and downstream drainage swales. The Department of Public Works will ensure that the Plan is implemented as proposed. Due to these factors, it has been found that the project will not result in significantly increased erosion or sedimentation potential and will not alter any drainage patterns of the site or area onor off-site. In addition, because erosion and sedimentation will be controlled within the boundaries of the project, the project will not contribute to a cumulatively considerable impact. For further information on soil erosion refer to VI., Geology and Soils, Question b.

. t	Substantially alter the existing drainage hrough the alteration of the course of a he rate or amount of surface runoff in a on- or off-site?	strea	m or river, or substantially increase
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

**Less Than Significant Impact:** The proposed project will not significantly alter established drainage patterns or significantly increase the amount of runoff for the following reasons, based on a Drainage Study prepared by Martin & Ziemniak Civil Engineering & Land Surveying, received April 3, 2007:

- a. Drainage will be designed to flow to either natural drainage channels or approved drainage facilities.
- b. The project will not increase surface runoff exiting the project site equal to or greater than one cubic foot/second.

Discussion/Explanation:

Therefore, the project will not substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding onor off-site. Moreover, the project will not contribute to a cumulatively considerable alteration or a drainage pattern or increase in the rate or amount of runoff, because the project will not substantially increase water surface elevation or runoff exiting the site, as detailed above.

h) Provide substantial additional sources of polluted runoff?			
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact

Less Than Significant Impact: The project proposes the following potential sources of polluted runoff: detached residential development. However, the following site design measures and/or source control BMPs and/or treatment control BMPs will be employed such that potential pollutants will be reduced in runoff to the maximum extent practicable: silt fences, fiber rolls, street sweeping and vacuuming, storm drain inlet protection, stockpile management, solid waste management, stabilized construction entrance/exit, gravel bag berm, material delivery and storage, spill prevention and control, concrete waste management, water conservation practices, paving and grinding operations and any minor slopes created incidental to construction and not subject to a major or minor grading permit shall be protected by covering with plastic or tarp prior to a rain event, and shall have vegetative cover reestablished within 180 days of completion of the slope and prior to final building approval. The following treatment control BMP's will used: grass swales, porous asphalt and porous concrete. Refer to VIII Hydrology and Water Quality Questions a, b, c, for further information.

Discussion/Explanation:

**No Impact:** The project site lies outside any identified special flood hazard area including a mapped dam inundation area for a major dam/reservoir within San Diego County. In addition, the project is not located immediately downstream of a minor dam that could potentially flood the property. Therefore, the project will not expose people to a significant risk of loss, injury or death involving flooding.

l)	Expose people or structures to a signific flooding as a result of the failure of a lev

ii.	TSUNAMI		
	<b>pact:</b> The project site is located more th of a tsunami, would not be inundated.	an a r	nile from the coast; therefore, in the
iii.	MUDFLOW		

**No Impact:** Mudflow is type of landslide. The site is not located within a landslide susceptibility zone. Also, staff has determined that the geologic environment of the project area has a low probability to be located within an area of potential or pre-existing conditions that could become unstable in the event of seismic activity. In addition, though the project does propose land disturbance that will expose unprotected soils, the project is not located downstream from unprotected, exposed soils within a landslide susceptibility zone. Therefore, it is not anticipated that the project will expose people or property to inundation due to a mudflow.

# **IX. LAND USE AND PLANNING** -- Would the project:

Potentially Significant Impact	$\overline{\checkmark}$	Less than Significant Impact
Less Than Significant With Mitigation Incorporated		No Impact
Discussion/Explanation:		

Less Than Significant Impact:
The project site has been classified by the California Department of Conservation – Division of Mines and Geology (Update of Mineral Land Classification: Aggregate

Materials in the Western San Diego Production-Consumption Region, 1997) as an area of "Potential Mineral Resource Significance" (MRZ-3).

However, the project site is surrounded by densely developed land uses including residential use types which are incompatible to future extraction of mineral resources on the project site. A future mining operation at the project site would likely create a significant impact to neighboring properties for issues such as noise, air quality, traffic, and possibly other impacts. Therefore, implementation of the project will not result in the loss of availability of a known mineral resource that would be of value since the mineral resource has already been lost due to incompatible land uses.

b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?
<ul> <li>□ Potentially Significant Impact</li> <li>□ Less Than Significant With Mitigation Incorporated</li> <li>□ No Impact</li> </ul>
Discussion/Explanation:
<b>No Impact:</b> The project site is zoned RS4, Single Family Residential, which is not considered to be an Extractive Use Zone (S-82) nor does it have an Impact Sensitive Land Use Designation (24) with an Extractive Land Use Overlay (25) (County Land Use Element, 2000).
<ul> <li>XI. NOISE Would the project result in:</li> <li>a) Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?</li> </ul>
<ul> <li>□ Potentially Significant Impact</li> <li>□ Less than Significant Impact</li> <li>□ Less than Significant Impact</li> <li>□ No Impact</li> </ul>
Discussion/Explanation:

Less Than Significant With Mitigation Incorporated: The project consists of a 3 parcel subdivision and will be occupied by residential uses. Based on a site visit completed by Mark Slovick on August 29, 2008 and as described in the Noise Analysis prepared by Investigative Science and Engineering Inc (ISE) and dated March 17, 2008, the surrounding area supports single family and rural residential uses. Incorporation of the building structure with specific sound barrier mitigation design and dedication of a Noise Protection Easement over the entire site will ensure that the project will not expose people to potentially significant noise levels that exceed the allowable limits of the County of San Diego General Plan, County of San Diego Noise Ordinance, and other applicable standards for the following reasons:

### General Plan - Noise Element

The County of San Diego General Plan, Noise Element, Policy 4b addresses noise sensitive areas and requires an acoustical study to be prepared for any use that may expose noise sensitive area to noise in excess of a Community Noise Equivalent Level (CNEL) of 60 decibels (dBA). Moreover, if the project is excess of CNEL 60 dB(A), modifications must be made to project to reduce noise levels. Noise sensitive areas include residences, hospitals, schools, libraries or similar facilities where quiet is an important attribute.

Project consists of a 3 parcel subdivision to occupy residential uses. Preliminary grading plans identify the foreseeable building structure envelopes of this 3 parcel subdivision. Based on the noise report, the primary noise source to impact the proposed subdivision will be from vehicular traffic traveling on Los Coches Road. The entire subdivision will be exposed to future traffic noise levels exceeding the 60 dBA CNEL County Noise Element-4b requirement. Although evaluation of interior noise levels are typically reviewed at the building stage, a Noise Protection Easement dedication will be required and shall be placed over the entire subdivision to ensure interior noise levels comply with interior noise level requirements of 45 dBA CNEL pursuant to Noise Element, 4b.

Proposed residential homes have been modeled and noise receptors have been placed throughout the project subdivision. Future traffic noise level calculations show that exterior noise sensitive receptors will be as high as 61.5 dBA CNEL at the most western Parcel 3. Noise mitigation will be required and will consist of two 5-foot high sound barriers in relation to the pad grade elevations on the most western Parcel 3. The northwest sound wall shall begin at the northwest facing facade of the building and extend approximately 33 feet along the northwesterly direction. The proposed southeast sound barrier shall begin at the southeast facing facade of the building and extend approximately 13 feet or up to the edge of the parcels southeastern property line. Please refer to Section: Future Traffic Noise Impacts, Figure 7 for noise mitigation details and sound wall location illustration. The combination of the proposed residential structure layout and sound barrier design will reduce exterior noise sensitive land uses at most westerly Parcel 1 to 60 dBA CNEL. Therefore, incorporation of the building structure with specific sound barrier design and dedication of a Noise Protection Easement over the entire site will ensure the project will comply with County noise standards pursuant to County Noise Element, 4b.

### Noise Ordinance - Section 36-404

Based on a Noise Analysis prepared by ISE and dated March 17, 2008 non-transportation noise generated by the project is not expected to exceed the standards of the County of San Diego Noise Ordinance (Section 36-404) at or beyond the project's property line. The site is zoned RS4 that has a one-hour average daytime sound limit of 50 dBA Leq. The adjacent properties to the east are zoned RR1 and also have one-hour average daytime sound limit of 50 dBA Leq. The project's noise levels at the adjoining properties will not exceed County Noise Standards.

Based on a Noise Analysis prepared by ISE and dated March 17, 2008, the project will not generate construction noise that may exceed the standards of the County of San Diego Noise Ordinance (Section 36-410). Construction operations will occur only during permitted hours of operation pursuant to Section 36-410. Also, It is not anticipated that the project will operate construction equipment in excess of an average sound level of 75dB between the hours of 7 AM and 7 PM.

Finally, the project's conformance to the County of San Diego General Plan (Noise Element, Policy 4b) and County of San Diego Noise Ordinance (Section 36-404 and 36.410) ensures the project will not create cumulatively considerable noise impacts, because the project will not exceed the local noise standards for noise sensitive areas; and the project will not exceed the applicable noise level limits at the property line or construction noise limits, derived from State regulation to address human health and quality of life concerns. Therefore, the project will not contribute to a cumulatively considerable exposure of persons or generation of noise levels in excess of standards established in the local general plan, noise ordinance, and applicable standards of other agencies.

	Exposure of persons to or generation of groundborne noise levels?	exces	ssive groundborne vibration or
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact
Discus	sion/Explanation:		

### **Less Than Significant Impact:**

The project proposes residences where low ambient vibration is essential for interior operation and/or sleeping conditions. However, the facilities are typically setback more than 50 feet from any County Circulation Element (CE) roadway using rubber-tired vehicles with projected groundborne noise or vibration contours of 38 VdB or less; any property line for parcels zoned industrial or extractive use; or any permitted extractive uses. A setback of 50 feet from the roadway centerline for heavy-duty truck activities would insure that these proposed uses or operations do not have any chance of being impacted significantly by groundborne vibration or groundborne noise levels (Harris, Miller Miller and Hanson Inc., *Transit Noise and Vibration Impact Assessment* 1995, Rudy Hendriks, *Transportation Related Earthborne Vibrations* 2002). This setback insures that this project site will not be affected by any future projects that may support sources of groundborne vibration or groundborne noise related to the adjacent roadways.

Also, the project does not propose any major, new or expanded infrastructure such as mass transit, highways or major roadways or intensive extractive industry that could generate excessive groundborne vibration or groundborne noise levels and impact vibration sensitive uses in the surrounding area.

Therefore, the project will not expose persons to or generate excessive groundborne vibration or groundborne noise levels on a project or cumulative level.

c)	A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?

d)		A substantial temporary or periodic incre vicinity above levels existing without the			
	]	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact	

## Discussion/Explanation:

## **Less Than Significant Impact:**

The project does not involve any uses that may create substantial temporary or periodic increases in ambient noise levels in the project vicinity including but not limited to extractive industry; outdoor commercial or industrial uses that involve crushing, cutting,

drilling, grinding, or blasting of raw materials; truck depots, transfer stations or delivery areas; or outdoor sound systems.

Also, general construction noise is not expected to exceed the construction noise limits of the County of San Diego Noise Ordinance (Section 36-410), which are derived from State regulations to address human health and quality of life concerns. Construction operations will occur only during permitted hours of operation pursuant to Section 36-410. Also, it is not anticipated that the project will operate construction equipment in excess of 75 dB for more than an 8 hours during a 24-hour period. Therefore, the project would not result in a substantial temporary or periodic increase in existing ambient noise levels in the project vicinity.

e)	For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

Less Than Significant With Mitigation

**Less Than Significant Impact**: The project involves a residential subdivision that will increase the use of existing neighborhood and regional parks or other recreational facilities. To avoid substantial physical deterioration of local recreation facilities the project will be required to pay fees or dedicate land for local parks to the County pursuant to the Park Land Dedication Ordinance (PLDO). The Park Land Dedication Ordinance (PLDO) is the mechanism that enables the funding or dedication of local parkland in the County. The PLDO establishes several methods by which developers may satisfy their park requirements. Options include the payment of park fees, the

No Impact

dedication of a public park, the provision of private recreational facilities, or a combination of these methods. PLDO funds must be used for the acquisition, planning, and development of local parkland and recreation facilities. Local parks are intended to serve the recreational needs of the communities in which they are located. The proposed project opted to pay park fees. Therefore, the project meets the requirements set forth by the PLDO for adequate parkland dedication and thereby reducing impacts, including cumulative impacts to local recreational facilities. The project will not result in significant cumulative impacts, because all past, present and future residential projects are required to comply with the requirements of PLDO. Refer to XVII. Mandatory Findings of Significance for a comprehensive list of the projects considered.

With regard to regional recreational facilities, there are over 21,765 acres of regional parkland owned by the County, which exceeds the General Plan standard of 15 acres per 1,000 population. In addition, there are over one million acres of publicly owned land in San Diego County dedicated to parks or open space including Federal lands, State Parks, special districts, and regional river parks. Due to the extensive acreage of existing publicly owned lands that can be used for recreation, the project will not result in substantial physical deterioration of regional recreational facilities or accelerate the deterioration of regional parkland. Moreover, the project will not result in a cumulatively considerable deterioration or accelerated deterioration of regional recreation facilities because even with all past, present and future residential projects a significant amount of regional recreational facilities will be available to County residents.

b)	Does the project include recreational facilities or require the construction or expansion of recreational facilities, which might have an adverse physical effection the environment?			
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact	
Discus	ssion/Explanation:			
<b>No Impact:</b> The project does not include recreational facilities or require the construction or expansion of recreational facilities. Therefore, the construction or expansion of recreational facilities cannot have an adverse physical effect on the environment.				
<b>XV. T</b> a)	RANSPORTATION/TRAFFIC Would to Cause an increase in traffic which is subload and capacity of the street system (in either the number of vehicle trips, the vocangestion at intersections)?	stanti .e., re	al in relation to the existing traffic sult in a substantial increase in	
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact	

Less Than Significant: The proposed project will result in an additional 30 ADT. The project was reviewed by DPW and was determined not to result in a substantial increase in the number of vehicle trips, volume of capacity ratio on roads, or congestion at intersections in relation to existing conditions for the following reasons: The adjacent roads are operating at a level of service "D" or better. Therefore, the project will not have a significant direct project impact on traffic volume, which is considered substantial in relation to existing traffic load and capacity of the street system.

b)	Exceed, either individually or cumulative established by the County congestion m by the County of San Diego Transportat roads or highways?	anage	ement agency and/or as identified
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact

Discussion/Explanation:

**Less than Significant Impact:** The County of San Diego has developed an overall programmatic solution that addresses existing and projected future road deficiencies in the unincorporated portion of San Diego County. This program commits the County to construct additional capacity on identified Circulation Element roadways and includes the adoption of a Transportation Impact Fee (TIF) program to fund improvements to roadways necessary to mitigate potential cumulative impacts caused by traffic from future development. This program is based on a summary of projections method contained in the County of San Diego Transportation Impact Fee Report dated January 2005, and amended in February 2008. This document is considered an adopted planning document which meets the definition referenced in the State CEQA Guidelines Section 15130 (b)(1)(B), which evaluates regional or area wide conditions contributing to cumulative transportation impacts. Based on SANDAG regional growth and land use forecasts, the SANDAG Regional Transportation Model was utilized to analyze projected build-out (year 2030) development conditions on the existing circulation element roadway network throughout the unincorporated area of the County. Based on the results of the traffic modeling, public and private funding necessary to construct transportation facilities that will mitigate cumulative impacts from new development was identified. Existing roadway deficiencies will be corrected through improvement projects funded by public funding sources, such as TransNet, gas tax, and grants. Potential cumulative impacts to the region's freeways have been addressed in SANDAG's Regional Transportation Plan (RTP). This plan, which considers freeway buildout over the next 30 years, will use funds from TransNet, state, and federal funding to improve freeways to projected level of service objectives in the RTP.

$\overline{\checkmark}$	Less Than Significant With Mitigat Incorporated	ion		No Impact
Discuss	sion/Explanation:			

Per the instructions for evaluating environmental impacts in this Initial Study, the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory were considered in the response to each question in sections IV and V of this form. In addition to project specific impacts, this evaluation considered the projects potential for significant cumulative effects. Resources that have been evaluated as significant would be potentially impacted by the project, particularly biology. However, mitigation has been included that clearly reduces these effects to a level below significance. This mitigation includes offsite purchase of non-native grassland and coastal sage scrub. As a result of this evaluation, there is no substantial evidence that, after mitigation, significant effects associated with this project would result. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.

-	49	-
---	----	---

,	considerable? ("Cumulatively considerable" means that the incremental effects a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?				
	Potentially Significant Impact Less Than Significant With Mitigation Incorporated		Less than Significant Impact No Impact		

The following list of past, present and future projects were considered and evaluated as a part of this Initial Study:

PROJECT NAME	PERMIT/MAP NUMBER	
Blossom Valley Mini Storage, Site Plan	S04-009	
Los Coches Major Subdivision	TM 5306	
Settlers Point	TM 5423, R05-004, S05-064	
Orlando TPM	TPM 21116	
Martinez Accessory Apartment, AD	AD 08-017	
Hickens Oversized Garage, AD	AD 08-024	
Cricenzo Property, TM, 8 Lots	TM 5525	
JBR Inc. Minor Subdivision	TPM 20569	
Laxson Second Dwelling Unit	ZAP 05-007	
California Investment Bankers TM	TM 5488	
Sky Rim Tank Major Use Permit	P06-080	
Los Coches TPM, 3 Lots	TPM 21033	
Rockcrest TPM	TPM 20997	
Hill Family AD	AD 07-026	

Per the instructions for evaluating environmental impacts in this Initial Study, the potential for adverse cumulative effects were considered in the response to each question in sections I through XVI of this form. In addition to project specific impacts, this evaluation considered the projects potential for incremental effects that are cumulatively considerable. As a result of this evaluation, there were determined to be potentially significant cumulative effects related to biology, noise and traffic. However, mitigation has been included that clearly reduces these cumulative effects to a level below significance. This mitigation includes offsite purchase of non-native grassland and coastal sage scrub, a noise protection easement, sound barriers and the payment of the Transportation Impact Fee (TIF) prior to issuance of building permits. As a result of this evaluation, there is no substantial evidence that, after mitigation, there are cumulative effects associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.

c) Does the project have environmental effects, which will cause substantial adverse effects on human beings, either directly or indirectly?

	Potentially Significant Impact	Less than Significant Impact
$\checkmark$	Less Than Significant With Mitigation Incorporated	No Impact

In the evaluation of environmental impacts in this Initial Study, the potential for adverse direct or indirect impacts to human beings were considered in the response to certain questions in sections I. Aesthetics, III. Air Quality, VI. Geology and Soils, VII. Hazards and Hazardous Materials, VIII Hydrology and Water Quality XI. Noise, XII. Population and Housing, and XV. Transportation and Traffic. As a result of this evaluation, there were determined to be potentially significant effects to human beings related to the following noise and traffic. However, mitigation has been included that clearly reduces these effects to a level below significance. This mitigation includes the dedication of a noise protection easement, sound barriers and the payment of the Transportation Impact Fee (TIF). As a result of this evaluation, there is no substantial evidence that, after mitigation, there are adverse effects to human beings associated with this project. Therefore, this project has been determined not to meet this Mandatory Finding of Significance.
